

RDS TXL Rapid Response Shelter System

TXL Rapid Response Shelter System (B + B)

The TXL Shelter System is designed to accommodate small aircraft, large land vehicles as well as grouped personnel. The frame of the TXL Shelter is manufactured using our proprietary material, Altrunium®. This material is lightweight and yet extremely robust and durable.

The system allows for rapid deployment using purely manpower, without electricity or special tools. It remains erect without electricity or an inflator, and unlike inflatable tents can operate even with punctures. It allows flexible deployment as B, or B + B, A + B or A + B + B (Please refer to the drawings on page 2).

Above: TXL Full Set A + B + B

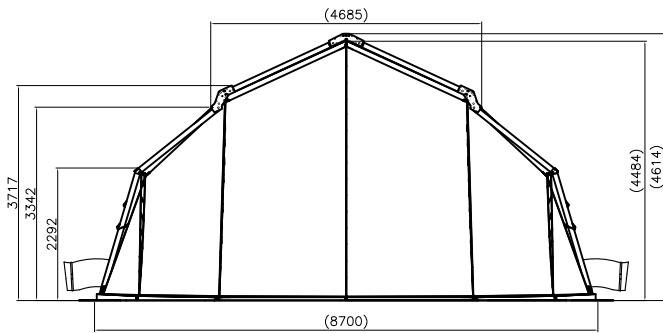

Above: Front view of TXL B section

Technical Specifications for recommend configuration (B + B)

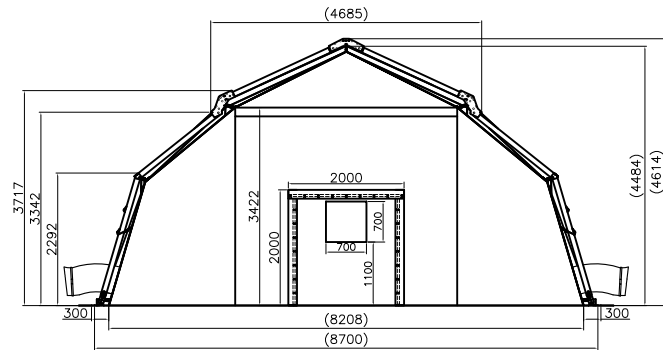

External Dimensions (excluding end cap, B + B)	10m X 8.7m X 4.61m
Internal Dimensions (excluding end cap, B + B)	10m X 8.2m X 4.61m
Weight per A end cap section	Approximately 75kgs
Weight per B section	Approximately 190kgs
